## The DRIVE LIFE project stakeholders

The DRIVE LIFE project promotes and applies a participatory approach.

The main DRIVE LIFE stakeholders are divided in 2 groups:

1. **DEMO FARMS:** composed by farmers and wine producers located in the districts of Colli Piacentini and Oltrepò Pavese.
2. **LIVING LABS:** composed by farmers, technicians (agronomist and oenologist) and wine producers that will give feedback about the tool and the vineyard management strategies based on a developed assessment procedure (Deliverable B3.2 – Assessment procedure). They come from other Italian regions and EU countries. Moreover, representatives of fruit growing industries will be part of this group to assess the transferability of the developed tools and methods to apple and peach orchards.  
10 Italian Regions and 5 EU Countries involved.
